

R&D laborant Zirfon.

[Apply Now](#)

Company: Agfa

Location: Mortsel

Category: healthcare-practitioners-and-technical

Recently, our Zirfon UTP 220 won the Essenscia innovation award. This was a crowning achievement for the innovative steps we make every day as a team in the hydrogen market. Today Agfa is the world leader with Zirfon as a membrane for alkaline water electrolysis and of course we want to keep our position, which is why we need you! An R&D lab technician eager to put his shoulders to the further development of Zirfon.

Job

You work in a multidisciplinary team in an R&D environment where you develop and evaluate membranes in consultation with the project leader.

You draft and execute test plans, both in a lab, pilot and production environment and you assist in shifting processes to other production facilities.

You process, interpret and report the results of your tests and formulate a proposal for further steps in development.

You actively follow up on developments in your research area.

You search for and apply new evaluation methods to evaluate the quality of products. You make safety and efficiency your priority.

You can independently write a work procedure that forms the basis of the manufacturing instruction. Based on this prescription, a quality dossier and a safety study, you introduce new formulas in manufacturing.

You establish and maintain the necessary contacts with the R&D labs, engineering, production, application, and innovation.

You work according to the applicable safety and ISO procedures and report in the databases provided for this purpose.

Profile

You have a bachelor's degree in chemistry or materials science (or equivalent through experience).

You are driven and have passion for product development.

Knowledge of membrane technology and/or electrochemistry or willingness to learn is a plus.

You have strong problem-solving skills and very good organizational skills.

You are a driven researcher and work methodically, keeping the end goal in mind.

You are able to independently work out a (partial) project in the context of the introduction in production of new processes and you take the necessary initiatives, paying attention to safety and quality.

You are stress resistant and persistent.

You are flexible and deal quickly and efficiently with different trial conditions and trial locations.

Offer

We are a Belgian company with an innovative mindset, offering high-tech solutions that contribute to a sustainable future. We offer a rewarding career in an international and changing environment, the opportunity to work with a talented and committed team of individuals, training and career development programs, and a competitive compensation and benefits package. If you want to be part of the Agfa experience, we'll take you there!

Reaction?

Curious about this opportunity? We also know that a job contains more than just 5 bullets! Apply! We love to tell you more about our company, the content of the function, responsibilities and possibilities. Just apply!
