Regional Environmental Leader M/F

Permanent contract

Location: France, Belgium, Netherlands, UK, Spain, Hungary

Geographical Areas of Responsibility: EMEA and APAC Regions

Role Summary/Purpose

This position is a part of the Veolia Water Technologies and Solutions (WTS) business level EHS staff focused on regional environmental activities. Success will be assured through building positive, effective working relationships with a wide range of internal and external customers. In this role, you will:

Essential Responsibilities:

- Build strong Environmental Programs utilizing ISO14001 and our Gensuite data management system to ensure effective programs
- Data mining and trend analysis of environmental issues to support improved performance. Participate in investigations of events and provide support with root cause analysis studies; support operations in driving implementation of corrective actions identified
- Develop and implement new initiatives to improve environmental performance – Focus areas include ISO14000 implementation across select facilities; storm/wastewater and air permit Structured What if Scenario (SWIFT) exercises and/or Failure Mode Effect Analysis (FMEAs).

- Support business by maintaining expert knowledge of applicable regulatory requirements and associated changes in environmental related rules that affect Veolia WTS
- Support compliance assurance efforts by conducting site level environmental audits with emphases on regulatory compliance and integrated ISO programs.
- Provide guidance and leadership on air, storm/wastewater permitting, and chemical reporting obligations
- Provide guidance and support regarding waste management compliance and associated vendor due diligence auditing and / or reviews.
- Drive completion of environmental related sustainability reporting, per Veolia Group expectations.
- Provide support regarding activities to reduce overall GHG emissions, water consumption and waste generation for affected facilities, support energy treasure hunts program
- Support environmental aspects of industrial risks prevention, related to high risk processes, Seveso regulations
- Support commercial and Inquiry to Order (ITO) steps on environmental performance information, and risk review process
- Support hazardous material transportation program and compliance in the region

Qualifications/Requirements

- Bachelor's Degree in Environmental Studies, Science, Engineering or other Environmental type discipline
- Minimum 10 years EHS experience, in both manufacturing and field service operations

Perfect command of spoken and written English is essential.

Eligibility Requirements:

- Willingness and ability to travel within region approximately 30-40% of the time

Desired Characteristics

- Able to effectively work in a matrix organization across business and Corporate wide
- Professional Environmental Engineer, or equivalent recognized Environmental related certification
- Adaptable with demonstrated ability to successfully manage multiple tasks and priorities

- Excellent written and verbal communication skills
- Customer and quality focused
- Strong leadership skills
- Knowledge of Environmental Laws within Areas of Responsibility
- High Energy / Self-Motivated / Change Agent
