## SAP Basis Consultant

SAP, cloud & infrastructure, some experience, consultant Belgium share on

The SAP Basis team at delaware is on the lookout for a Senior SAP Basis Consultant who will be directly involved in building SAP technologies and develop the processes to continually operate, innovate, and grow; someone with a deep knowledge of systems administration and technical architecture, as well as a proven track record and experience with SAP HANA and related technologies.

Relying on your extensive experience in the world of SAP solutions, you will play a key role in building the customer's technology roadmap while working closely with our infrastructure and functional teams. You will be the go-to person who guides our customers when it comes to deciding what SAP technical architecture to follow.

The design, development, and support of our SAP solutions include the following:

- Performing complete upgrades, migrations, SAP landscape installations and technical change management projects in close collaboration with our clients.
- Completing project lifecycles: from initial set-ups to solution delivery and support.
- Working with clients to analyze their needs: preparation and participation in workshops, including documentation.

- Using innovative solutions in old and new SAP landscapes (cloud solutions, SAP HANA, SSO, mobile devices, etc).
- Leading projects by discovering different solutions and taking on more responsibility as you progress in your career.

As a Senior SAP Basis Consultant, we expect you to follow all the latest trends in IT and use these insights to take your deliverables to the next level.

**Apply for SAP Basis Consultant!**

**Thank you for your application.**

**We will get back in touch with you soon! Have a great day!**

**Who are we?**

We are the team of testing CoE falling in the solution of **Core meets cloud**. The solution specializes in the implementation of end to end public cloud solution in the ecosystem of Microsoft and SAP. As testing CoE our integral role is to ensure the business continuity by regularly testing for quality, performance and security. We also provide solutions to customers with testing as a service with offerings including functional testing, user acceptance testing, automated testing, quality coaching and test governance. The range of applications include ERP applications, modernized web applications, micro-service based applications and many. We are also constantly evolving/expanding our scope of testing solutions in the overall IT landscape.

Are you excited being part of this journey? Are you interested in not just building, but redefining our customers' entire IT landscapes? Then keep on reading!
