SAP BI Consultant

SAP, data & ai, lot of experience, consultant Belgium share on

You believe working in **data** is all about bringing **added value** and helping customers achieve their business goals.

Eager to start **building** data solutions from A – Z that are **impactful** and add an extra layer of meaning to the data? This means blueprinting, setting up rough drafts of new reports, design and build useful dashboards, ... That's exactly who we are looking for!

Apply for SAP BI Consultant!

Thank you for your application.

We will get back in touch with you soon! Have a great day!

read our stories

Who are we?

The **SAP Data & AI team** at Delaware is the bridge between **business processes** and data analytics. Our playground is **SAP Analytics Cloud** and **SAP BW/4HANA**, but we work closely with our functional colleagues, who are specialized in SAP ERP. In this sense, we combine the best of both worlds. The most rewarding part of our job is seeing how our customers gain **insights** into information they never even knew existed, simply because

they didn't know where to look.

We want to help our customers get to know their own company even better. We're a mixed group of experienced data lovers, skilled in **data cleaning**, **data warehousing**, **data analytics**, **data management**, and **data science**. We have advanced knowledge in data technology, but we always separate the solution from the tool. We never forget the "why".

Does this sound like music to your ears? Then you might be the SAP BI consultant we're looking for.

Just so you know: delaware has its offices in **Antwerp, Ghent, Kortrijk, Lummen, Liège** and **Wavre**, but we also spend a lot of time working with our customers **onsite**, where we follow the rhythm of the client. We work where we work best, when we work best.
