SAP EAM Consultant

SAP, supply chain & operations, lot of experience, consultant Belgium share on

We – **the delaware ‘Asset Management’ team** combine sound business knowledge of **EAM and field service** with the provision of the optimal technological solution, and we do that in a unique and creative way. For us, that combination of business and technological expertise is crucial and we’re keen to further strengthen our team with your senior knowledge and experience!

Are you the **SAP EAM Consultant** we’re looking for? The one who will work with us to help **take the service and maintenance organization to the next level** for a wide variety of companies? Will you join us in rising to the challenge of achieving further digitalization within the scope of ISO ?

Apply for SAP EAM Consultant!

Thank you for your application.

We will get back in touch with you soon! Have a great day!

read our stories

What will you be doing as an SAP EAM consultant?

As SAP EAM Consultant you not only work on all kinds of **SAP PM/CS implementations** but

you also get involved in **mobile solutions, planning systems, information management systems** and **reporting tools**

As a consultant you're involved from the **start** (the analysis and blueprinting phase), throughout the **implementation** (the development and customizing phase) and right through to the **finish** (the documentation, trainings, 'go live' and support phase), so literally from A to Z. This guarantees you a very **varied role**.

Our customers come from a **broad spectrum of industries**, but they all have one thing in common: our implementations enable their maintenance and service organizations to operate more efficiently.

Our projects generally have a lead time of between 30 and 50 man-days and are run by a project team comprising 2 or 3 delaware employees.

In addition to working with them, you will also work in close and frequent collaboration with delaware colleagues from **other business units** such as SAP PP, for example, or with our mobile team for mobile applications such as our Delaware Field Anywhere© (a mobile solution for field technicians) or Delaware Scheduling Anywhere© (our user-friendly planning tool).

Projects are always done in close cooperation with our customers. 60 to 70% of the time you work **on the customer's premises** to ensure customer proximity. The rest of the time you are more than welcome at one of our regional offices in Antwerp, Gent, Kortrijk, Wavre, Liège or Lummen. It is important to us too, that you get to know your delaware colleagues.

Some projects that we are currently working on: Implementation of a service planning board combined with a mobile application for the service technicians of a large coffee-roasting company. Implementation of SAP PM at various European sites for various international food companies. Implementation of a 'smart meter' project combined with a mobile application for intervention management by technicians from a major energy company.
