## SAP IS U Consultant

SAP, supply chain & operations, lot of experience, consultant Belgium share on

In today's rapidly-changing energy world, new challenges often require new solutions. The same goes for **utility industry solutions** which are heavily impacted by the increasing decentralization of energy production – through e.g. solar panels and wind turbines – and the digitization of meters for end-users.

For key customers in the industry, delaware is currently building **state-of-the-art industry solutions**, using the latest **SAP S/4HANA** functionalities. We streamline the rising flow of data coming from digital meters in the field and ensure the correct calculation of volumes and consumptions of consumers.

That's why we're looking for an **experienced SAP IS-U consultant**, someone who not only brings knowledge, but also brings peace. Our long-term implementation programs include very large and innovative utility projects at key customers in the water & energy landscape.

You wouldn't want to miss out on that, would you?

**Apply for SAP IS U Consultant!**

**Thank you for your application.**

**We will get back in touch with you soon! Have a great day!**

read our stories

## What will you be doing as an SAP IS-U consultant?

As an SAP IS-U consultant, you'll be involved in the entire implementation project. This means you'll guide the customer from **analysis**, **blueprinting** and **customization**, up until the actual **go-live** of their brand new system.

Depending on the **SAP IS-U** module in which you've gained experience, you'll provide expert advice within SAP IS-U and support colleagues and stakeholders on how to best align business processes and solutions.

First, you'll **estimate the effort and time required** for solution design, configuration, implementation and unit/integration testing.

Armed with a complete **functional analysis**, you'll deliver the IS-U configuration, implementation and testing within the agreed timeline and budget. If extra programming is necessary, you'll write the **specifications**.

You'll make sure that the solution design, configuration and implementation synchronizes with the **application and data architecture** including **interfaces** and **integrations**.

Needless to say, you'll follow the development carefully and **test** everything thoroughly before it is released to users.

You'll take **younger, less experienced colleagues** under your wing and **show them the ropes**.

Next to your consultancy assignments, you'll also fulfil a minor commercial role, while you assist your colleagues in creating **presales** proposals.

You'll spend much of your time working on site at the customer's offices, where you'll always be surrounded by your delaware colleagues. You can also meet your other colleagues in one of the delaware offices in **Gent**, **Antwerpen**, **Wavre**, **Liège**, **Kortrijk** or **Lummen**,
