

## Security Architect

[Apply Now](#)

Company: AVIV Group

Location: Brussels

Category: computer-and-mathematical

### Job Description

#### Role

Senior Security Architect reports directly to the Head of Security Architecture. The primary responsibility entails integrating security considerations into the design and execution of business projects. Collaborating closely with product managers and IT leaders, the Security Architect evaluates outcomes to ensure alignment with the organization's security standards. Serving as the technical expert, they define security models and guide the development of architectures in line with the company's security strategy.

#### Qualifications

##### What you can expect

Analyze security requirements, conduct risk assessments, and ensure proposed solutions meet security standards,

Define additional security measures and initiate assessments, tests, or audits,

Qualify residual security risks pre-deployment and establish information security architecture aligned with company strategy,

Develop architecture reference models and translate security policies into operational standards,

Support project managers in designing architectures and specifying technical security requirements,

Advise on secure technical solutions and regularly review existing architecture to improve security,

Analyze security risks associated with new technologies, monitor new threats, and report risks to the CISO,

Contribute to implementing the company's cybersecurity program and foster collaboration with the CyberSOC function.

### **About you**

Demonstrated expertise in information security,

Proficiency in security architecture,

Deep understanding of AWS security solutions,

Proficiency in web application security methodologies and technologies,

Ability to collaborate seamlessly across different departments,

Strong project management skills,

Fluent English communication skills, especially in professional settings.
