

Security Architect – Privileged Access Management

[Apply Now](#)

Company: Devoteam

Location: Machelen

Category: computer-and-mathematical

Company Description

Devoteam is a leading consulting firm focused on digital strategy, tech platforms and cybersecurity. By combining creativity, tech and data insights, we empower our customers to transform their business and unlock the future.

With 25 years' experience and 10,000 employees across Europe, the Middle East and Africa, Devoteam promotes responsible tech for people and works to create better change.

Join our global community of exceptional talents at Devoteam, where you'll collaborate with multidisciplinary teams of data specialists, business consultants, solution architects, security experts, cloud engineers, developers, and more across over 20 countries in the EMEA region.

As a member of our team, you'll have the opportunity to work with the world's leading partners, including AWS, Google Cloud, Microsoft, and ServiceNow, driving innovation and advancing your career.

Job Description

What are we looking for?

At Devoteam, we believe cyber is about creating a more secure future for our customers.

Our Cyber Security consultants leverages technologies of trusted partners to help clients control which employees, partners, suppliers, customers, and citizens have access to sensitive organizational applications and data. We also focus on the integrations of cutting-edge technologies in the cyber security space. Our team is dedicated to enhancing the security programs of our clients so they can mitigate risk, reduce intrusion, and secure information. If you're seeking a career in cyber security, then this opportunity might be right

for you.

What will your day look like?

As a Privileged Access Management Architect, you will work together with other Devoteam members and our clients to develop and enhance their current privileged access management solutions, focusing on operational, process and resource efficiency.

In this role, you will primarily be involved in the architecture and design of PAM solutions that integrate with new or existing platforms including provisioning, de-provisioning and integration of applications for authentication.

You will mainly support transformational projects including the integration and interaction of privileged access management, governance and privileged identity, to provide a holistic identity solution for our clients across their employees, suppliers, and customers.

It will include the design of customized solutions for our clients, not basic product installation. Therefore, you will have to analyze and understand our client's specific business principles and requirements. You provide guidance on a systematic approach to respond to these requirements within our client's budget and timeframe.

Additionally, a core responsibility of your role will be the continuous improvement and innovation of our Privileged Access Management solutions offering.

Who will you work with?

You will be part of the Cyber Trust team with more than 50 people in Belgium, exchanging insights and knowledge, "ensuring a secure IT environment protecting the business goals". You will work with our customer's business and technical employees to capture, discuss and verify cyber risks. You work on flexible daily basis, on-site at client's office, at Devoteam in Zaventem or at home. You will report to your practice manager, who will be your point of contact for development and career guidance.

Qualifications

We Hire for Attitude and Train for Skills...

The person we are looking for combines the qualities of a good communicator and passion for Cyber Security. The more boxes you can tick in the list below, the closer you match the ideal profile we are looking for.

The right skills and experience

Knowledge and implementation experience in the design, engineering and deployment of Privileged Access Management solutions, ideally on CyberArk (CyberArk PAS Suite, CPM, PSM, AIM, CCP - PSM and CPM Connectors)

Solid MS Windows and Linux technical knowledge and operational experience: AD, IIS and Windows Security.

Good understanding of security concepts and technologies in the wider Identity and Access Management space: Logical Access Controls, LDAP and RBAC, Authentication solutions, PKI concepts and SIEM solutions

Awareness of the Information Security space and related compliance frameworks: Data Protection Act, EU GDPR, PCI-DSS and SOX

Desired/Preferred Certifications

Master's degree in computer science/Engineer/Cyber Security or relevant work experience in IT Security.

Information Security Certifications are nice to have

Do you recognize yourself in our ideal profile?

You have a passion for Cyber Security, being the basic ingredient of success.

You have the necessary soft skills set to successfully understand, challenge and translate the business needs and communicate to the relevant parties with a structured and methodical approach to problem solving

You are a team player and have the talent to cooperate with colleagues in in a changing and fast evolving environment.

You are well organized and work effectively and independently.

You are a self-starter, pro-active and you take initiative.

You are creative, have a critical mind and you like to think out-of-the-box, with focus on solutions rather than problems.

You are prepared to constantly keep your knowledge up to date, follow trainings or through self-study.

Customer focus is your second nature

You are fluent in Dutch and/or French and have a good working knowledge of English

Some of the reasons why you should not hesitate to join us

New colleagues are well supported by an enthusiastic team of experts.

A culture of continuous development: at Devoteam, we provide you with the right environment to develop talent and expertise: we invest in our people, help them to grow with the warranty to always use the latest technologies.

As part of our Cyber Trust team, you will constantly be in contact with colleagues to learn from them and reverse and you will get the opportunity to contribute to the definition of our Cyber Trust strategy.

Our presence in major companies of telco, public and finance services sectors provides you with the opportunity of building relationships and skills that will last your entire professional life.

Additional Information

#techies in our minds, #creatives in our hearts, #change in our DNA.

Why choose us?

Cutting-edge Technology : Embrace the latest advancements in IT and digital technologies as we constantly innovate to stay ahead of the competition. Our commitment to adopting state-of-the-art tools and methodologies ensures that you'll work on projects at the forefront of the industry.

Entrepreneur mindset: We value our people over processes. You will develop and grow in an agile and ambitious company where it's okay to take risks, make mistakes and change plans to find transformative solutions. At the same time, you will learn from the best, building relationships and skills that will last your entire career.

Endless Learning Opportunities : We value personal and professional growth. Through workshops, conferences, and certifications, we offer the resources needed to expand your skill set and reach new heights in your career.

Connect with amazing people : You will become part of a network of +10,000 Devoteamers spread over 20 countries.

Collaborative Culture : Teamwork is at the heart of our organisation. You'll be working side by side with a diverse group of IT experts who share your passion for excellence and will

inspire you to think outside the box.

Impactful Projects : Tackle real-world challenges that matter! From revolutionising business processes to developing innovative solutions, you'll have the chance to make a genuine and positive impact on our clients and the community.

Work-Life Balance : We believe in a healthy work-life balance, ensuring that you have time to unwind, pursue your hobbies, and spend quality time with loved ones.

Inspiring and eco-friendly workplace : We just moved to an amazing new building. We believe an inspiring workspace fuels creativity and fosters a positive work culture, allowing our employees to reach their full potential. The Wings building is also designed with eco-friendly features and energy-efficient systems. By reducing our ecological footprint, we are contributing to a greener future and aligning our business practices with our environmental values. The building is also very easily accessible by public transportation.

Competitive package : We offer a competitive salary package with additional benefits like a company car, smartphone, medical insurance, pension plan, net allowance, laptop, meal vouchers, etc. We review our salary grid twice a year to ensure we are in line with the market.

At Devoteam, we combine strong values – respect, frankness, ambition, entrepreneurship & collaboration - with a fun environment that empowers you to innovate and succeed.
