## Senior Analog Designer

[Apply Now](#)

Company: ic resources

Location: Belgium

Category: computer-and-mathematical

I am currently recruiting a Senior Analog Design Engineer to join our rapidly expanding organisation located in the North of Belgium. As a key contributor, you will be entrusted with overseeing analog and mixed-signal circuits for my client's RF products.

Your primary responsibilities will encompass, but not be limited to:

Defining and executing system-level designs for analog and mixed-signal modules and circuits.

Conducting comprehensive tasks such as circuit design, layout, and verification of analog blocks.

Performing top-level simulations, layout, Design Rule Check (DRC), and Layout vs. Schematic (LVS) activities.

I am in search of an individual who can confidently take ownership of their work and emerge as the go-to person in analog design. A substantial background in this field, coupled with a passion for driving innovation, is essential.

It's important to note that regular presence at my client's office on a weekly basis is expected.

This role offers a distinctive opportunity for you to make a substantial contribution to our client's growth and success.

If you are an experienced Analog Designer seeking a challenging yet rewarding position,

I encourage you to apply.

For further information, please reach out to Parm Shergill.
