The role

We're developing automation to deploy applications in the cloud and seeking a Software Engineer/Developer who is familiar with cloud and cloud technologies.

A key part of the role is designing, developing, and championing an automated approach to cloud delivery. We are looking for someone who is well-versed in development, familiar with Azure services and has experience working in a highly collaborative fast-paced environment.

Responsibilities

You'll apply Infrastructure as Code solutions and drive platform automation against core platform services supporting all aspects of IaaS, PaaS and SaaS solutions. Key responsibilities include:

Building cloud resources with Terraform, specifically in an Azure environment.

Automation, deployment and management of cloud resources.

Deployment of infrastructure and applications.

2nd and 3rd line support.

If you are highly skilled in this area and want to further advance your skills, this is the perfect what's next opportunity for you!

Requirements

Essential:

Extensive experience with Ansible and Terraform

Experience building and maintaining Azure infrastructure (Azure Virtual Machines, SQL PaaS, Azure storage, Azure Devops).

Experience with GitHub.

Strong problem-solving skills.

Experience in automating infrastructure and software delivery pipelines.

Resilience and an ability to work autonomously.

Bonus points if you have:

Familiarity with enterprise networking, DNS, Firewalls.

Exposure to Python, Node.js, GIT and deploying applications on Azure.

Ability to learn/use a wide variety of open-source technologies and tools.

Strong communication skills and language bridging between development team and business stakeholders.

Technical understanding of application design, agile methodologies and SDLC life cycle.

Ability to work with and influence software development teams

Demonstrated ability of successfully mentoring and training fellow team members

Azure Certification
