Senior Consultant- Angular, Node JS, Databases

Consultant

116656BR

Job Description

Role –Consultant

Technology – Angular, Node JS, Databases

Location– BRUSSELS

Job Description

As a Consultant, you are an expert at contributing to different phases of the consulting lifecycle. You will be intensely involved in; you will define the problem, propose and refine the solution. You will also play an important role in the development, configuration and deployment of the overall solution. You will guide teams on project processes, deliverables and contribute to the proposal development, client training and internal capability-building and help detail the project scope. You will have the opportunity to shape value-adding consulting solutions that enable our clients to meet the changing needs of the global landscape.

Responsibilities:

Working in a team to develop applications and services using Agile methods.

Building customer-facing UI and back-end services

Designing and implementing applications with low latency, high availability, and performance

Understanding the entire web stack, including protocols and web server optimization techniques

Mentor, and help the team technically.

Should be able to work with the team and inspire them to reach their goals.

Collaborate with your team (developers, designers, product owners, QA) to define, design, and ship new features.

Identify and correct bottlenecks, fix bugs and improve application performance.

Continuously discover, evaluate and implement new technologies to maximize development efficiency.

Determining project requirements and developing work schedules for the team.

Identifying risks and forming contingency plans as soon as possible.

Being transparent with the team about challenges, failures, and successes.

Writing progress reports and delivering presentations to the relevant stakeholders.

Skills:

Total experience 5+ years

3+ years of experience in backend development - Node.js (Next, Express) , Java based REST/GraphQL API development in microservice service based architecture.

Good experience in web development using Angular.

3+ years of experience with database systems, with knowledge of SQL and NoSQL database

Ability to write effective documentation, test cases (Jest/Jasmine/Karma)

Basic web frontend technology understanding (HTML//CSS/JavaScript/TypeScript)

Angular knowledge, e-commerce experience, headless CMS knowledge

Experience backed with rich domain knowledge in Software Analysis, Design, Development, Implementation and Testing of Web-based and Enterprise Applications using JAVA/J2EE technologies.

Personal

Besides the professional qualifications of the candidates we place great importance in addition to various forms personality profile. These include:

High analytical skills

A high degree of initiative and flexibility

High customer orientation

High quality awareness

Excellent verbal and written communication skills
