

## Senior Data Engineer

[Apply Now](#)

Company: The Glue

Location: Belgium

Category: computer-and-mathematical

Imagine yourself in a role where you'll be working with your clients to provide world-class data solutions, as well as steering and coaching the internal team of more junior data engineers.

This is a great opportunity to make an impact at a growing company. The Glue is part of Projective Group, offering international opportunities from data extraction to visualization, robust and compliant.

Responsibilities for this role include:

You migrate and transform data into actionable information

You lead your data team and take end-to-end responsibility in building innovative bespoke data solutions

You are the technical link between the client's project team and the engineers of The Glue.

You transform the (non-functional) client wishes into documented designs and solutions. You define the optimal data solution taking into account the existing capabilities our reference architecture and data capabilities

You actively support data exploration and data preparation phases

You autonomously design, develop and launch data pipelines respecting data quality controls

You liaise with infrastructure and DevOps teams to ensure non-functional requirements are met (security, availability, compliance, performance...)

You coach the data engineering team, perform reviews of their deliverables and help them grow

You work together with our functional and technical analysts to deliver optimal data solutions

**Keywords:** Data Engineer | Data Solutions | Data Architecture | Senior | Financial Services | Capital Markets | Project Management | Coaching | Team lead

### **What are we looking for?**

You have experience in analysis and creation of data pipelines, data architecture, ETL/ELT development and with processing structured and unstructured data

You can write performant code and SQL statements and are proficient in some of the key languages, frameworks and tools

You can design solutions that are fit for purpose whilst keeping options open for future needs

You have proven experience in identifying and clarifying customer requirements showing strong verbal and written communication skills and good customer relationship skills

Strong interest in the financial industry and related data

You are versatile to work on technical topics at different stages of a data project life-cycle (i.e. sales pre-studies, design and architecture, development, testing, roll-out...)

You are highly analytical and able to understand the client's non-functional requirements

You are passionate about following any new technological trends

You have good knowledge of cloud-based data architectures

You have a proactive approach and are able to work autonomously

You are agile minded, enthusiastic and a dynamic team player with leadership skills

You are fully capable of working in English

You have an excellent knowledge of French or Dutch with, at least, a basic understanding of the other national language

**Ok, I'm interested; what can I expect?**

You will work in a very dynamic startup environment, with a flat structure and no office politics

You get the chance to join a growing company, surrounded by supportive and ambitious colleagues

A fully renovated office in Diegem, designed according to the highest office standards (read: there's a very nice bar)

Amazing benefits, incl. a company car and flexible homeworking options
