Senior Engineer (Java)

Hasselt, Belgium

Do you get energy from building scalable, modular services that are ready to embrace a serverless cloud future? If software engineering within an ever-growing platform is your expertise, we would like to talk to you!

TrendMiner, a Software AG company, develops discovery, diagnostic & predictive analytics solutions for industry. Our cross-functional agile development team is developing the next generation data mining product for the process industry. TrendMiner is growing fast, so we're always on the lookout for ambitious and enthusiastic new talent.

Be you, join us.

As a **Senior Developer** in the Powerful Analytics team, you will be working on challenging and core parts of our platform. You will need development experience with data analytical products and have the ambition to learn new innovative topics.

Essential functions

You will be part of a fun agile team to grow and build our platform.

Work with the team and leverage your knowledge to inspire and grow others.

Assist in evolving and maintaining technical ways of working and best practices.

Work with the product owner and team architect to define and elaborate technical designs.

Assist in evolving our platform architecture together with the team architect.

Minimum requirements

More than 5 years of proven experience building micro services platforms.

Solid experience using **Java** and Spring Boot

Experience with timeseries and analytics is considered an asset.

Applied knowledge of software engineering best practices (TDD, DDD, SOLID, etc.)

Eager to learn new skills & explore new technologies, and share knowledge within the team.

Passionate about software development, innovation, and creative thinking

Team player both in attitude and in terms of achieving results.

Fluent in English, knowledge of other languages is a plus.

Experience with other technologies in our product portfolio is an advantage, in particular: Kubernetes, Angular, Python, Streaming & Event-driven stacks.

Have a wide and/or deep technical/specialized knowledge and experience in your own discipline.

Be able to understand internal/external business and product requirements and use design best practices to improve technical/specialized products/services.

Analyze complex technical/specialized challenges independently to propose structural solutions that fit the architectural strategy.

Be a valuable resource for colleagues with less experience.

Contribute influentially to development projects and manage functional projects.

Pro-actively raise awareness of risks and issues for topics you own, so that priorities, planning and expectations can be managed to fit reality.

Do not miss the opportunity to…

Become part of a smart and ambitious team that will help you thrive.

Experience the rise of a successful and fast-growing company.

Join a dynamic environment with a lot to learn and do.

Work in and with international teams that are focused on delivering excellent value to our customers.

Work on an innovative big data analytics product.

What we offer

A competitive compensation package including a company car.

Flexible working hours and attention to work/life balance.

Your choice of laptop (Windows, Linux, Mac).

Meal vouchers.

Hospitalization insurance (DKV).

Group insurance.

Net benefits.

An open-minded culture where you can 'be your best you'.

Personal Learning and Development budget and guidance.

Company managed and external training opportunities.

Exciting and challenging initiatives and projects and the possibility to make a real difference.

The opportunity to join a visionary technical innovator and work with state-of-the-art tools.

A great office at Corda in Hasselt.

A 60% remote work policy.

At Software AG we are committed to providing an environment of mutual respect and fairness where equal employment opportunities are available to all applicants and employees without regard to race, colour, religion, gender, pregnancy, national origin, age, physical and mental disability, marital status, sexual orientation, gender identity, and any

other characteristic protected by applicable law.

We believe that diversity, equity, and inclusion is critical to our success as a global company, and we seek to recruit, compensate, develop, promote, and retain the most talented people from a diverse candidate pool.
