

## Senior Engineer .NET (Belgium)

[Apply Now](#)

Company: Trendminer

Location: Belgium

Category: computer-and-mathematical

### Your challenge

As a Senior .NET Developer, you will be working on our historian connectivity tech stack by preparing it for an infinite scalable future in the cloud. You will be working in the team to make sure the skills are present to prepare our current solution for this reality, ensuring we can offer the best possible user experience. You are driven by efficiency and can leverage practical knowledge about the .NET ecosystem to create an efficient and qualitative delivery of our software.

### What you will do

You will report to the Team Lead and collaborate to grow and build our connectivity platform

Work with the Team Architect and inspire, grow others, together

Assist in defining the way of working from a technical perspective

Apply DevOps best practices in the Team's mindset

Be the technical coach for your peers

Assist in defining the platform architecture together with the Team Architect

### Expectations

Have a wide and/or deep technical/specialized knowledge and experience in your own discipline

Have knowledge about internal/external business issues/problems and use best practices to improve technical/specialized products/services

Analyze complex technical/specialized problems and adapts standardized solutions to these problems

Can work independently

Be a valuable resource for colleagues with less experience

Contribute influentially to development projects and manage functional projects

Where necessary, can influence priorities

### **What you bring along**

About 5 years proven experience building microservices platforms using C# in the .NET ecosystem

Applied knowledge of software engineering best practices (TDD, DDD, SOLID, etc.)

Experience with streaming and data integration is considered an asset

Software engineering background or significant relevant experience

Eager to learn modern technologies and share your expertise with the team

Passionate about software development, innovation, and creative thinking

Team player both in attitude and achieving results

Broad interest in technologies

Fluent in English, knowledge of other languages is a plus

Experience with other technologies in our product portfolio is an advantage, in particular: Kubernetes, Angular, Golang, Python, etc.

### **Do not miss the opportunity to...**

Become part of a smart and ambitious team that will help you thrive

Experience the rise of a successful and fast-growing company

Join a dynamic environment with a lot to learn and do

Work in and with international teams that are focused on delivering excellent value to our

customers

Work on an innovative big data analytics product

Design, implement, and test features using agile and DevOps methodologies.

### **What we offer**

A competitive compensation package including a company car.

Flexible working hours and attention to work/life balance

Your choice of laptop (Windows, Linux, Mac)

Meal vouchers

Hospitalisation insurance (DKV)

Group insurance

Net benefits

An open-minded culture where you can 'be your best you.'

Personal Learning and Development budget and guidance

Company managed and external training opportunities

Exciting and challenging initiatives and projects and the possibility to make a real difference.

The opportunity to join a visionary technical innovator and work with state-of-the-art tools.

A great office at Corda in Hasselt

A 60% remote work policy
