

Senior Industrial Water engineer F/M/X

[Apply Now](#)

Company: Amaris Consulting

Location: Belgium

Category: computer-and-mathematical

Job description

The Senior Water Engineer will be entrusted with a multifaceted set of responsibilities designed to make an immediate and lasting impact:

Technical Validation: Ensure the technical integrity and viability of construction and operational proposals, guaranteeing they meet both the center's high standards and our clients' expectations.

Project Engineer Support Provide robust support to Project Engineers, guiding them through complex decision-making processes and ensuring project alignment with strategic goals.

Commercial Prospecting Support: Offer technical expertise during commercial prospecting phases to secure new opportunities and partnerships.

Execution Phase Engineering Play an active role in the execution phase of engineering projects, overseeing the design and implementation of water treatment solutions.

Knowledge:

The ideal candidate will possess a deep and comprehensive understanding of water engineering principles, specifically within the industrial sector:

A proven track record of project delivery within the water engineering field.

Expertise in water treatment processes and technologies suitable for industrial applications.

Familiarity with environmental regulations and sustainability best practices in water management.

Strong foundation in both the theoretical and practical aspects of water engineering, from diagnostics to design and build phases.

Qualifications:

Advanced degree in Civil, Environmental, Water Resources Engineering, or Chemistry.

5+ years of experience in water engineering with a focus on sustainable development.

Demonstrated success in leading complex water-related projects from conception to completion.

Excellent communication skills, with the ability to convey technical concepts to non-technical stakeholders.
