## Senior Intelligent Process Automation Consultant (RPA/IPA)

### Role overview:

As an Intelligent Process Automation consultant, you will have the opportunity to lead the opportunity assessment for Intelligent Process Automation, including process optimization recommendations and the creation of a solid business case. This embraces the definition of our client's Intelligent Automation strategy to the actual delivery. The role requires you to be curious to actively gather information about new IPA trends and develop as well as promote (new) service offerings according to the current market needs and demands.

### Responsibilities:

Drive the pipeline generation by evangelizing the client's IPA vision and success

Take ownership of the U(A)T execution together with your stakeholders to ensure deliverables of the highest quality

Spot process automation opportunities and potential proof-of-values and define a value proposition that includes the best-suited automation technology according to our clients IPA strategy

Be an inspiring coach for your junior team members and staff of the client that will join the IPA team

Report about the progress of delivery and the performance of processes in production

### **About the candidate:**

A minimum of Bachelor's degree in Computer Science, Data Science, Applied Sciences, Software Engineering or Business/Economics degree with an affinity for technology

Several years experience in the process automation field or IT consulting industry

Being familiar with Agile methodologies such as Scrum and being able to be the technical lead on IPA projects

You can act as a trusted advisor for our clients and have the capabilities to advise on end-to-end automation solutions covering multiple technologies

Fluent in English and either Dutch or French

### **About Sprint Reply:**

Sprint Reply is the Reply Group company specialised in Intelligent Process Automation. Our mission is to create automation platforms capable of solving concrete business problems, supporting our customers in the transformation towards the Intelligent Enterprise and the adoption of a scalable and efficient Digital Workforce. In Sprint Reply we combine an execution oriented engineering approach with strong experiences on 4 technology families, Robotic Process Automation, Computer Vision & ICR, AI & Machine Learning and Process Mining, dedicating constant attention to R&D on various Artificial Intelligence issues.
