

Belgium Jobs Expertini®

Site Reliability Engineer

[Apply Now](#)

Company: Klarrio

Location: Belgium

Category: computer-and-mathematical

Klarrio is working daily on very cool and challenging data .

When these projects are put into production and are running mission-critical workloads, someone needs to monitor and safeguard the platform. A combination of problem-solving and platform expertise is required. Technology evolutions are allowing us to predictively act before damage is done. A Site Reliability Engineer (SRE) at Klarrio has the right mix of development, support, and problem-solving skills. Klarrio operates with a follow-the-sun principle by having SRE's in multiple continents, avoiding the need to do shifts. In a day and age where minutes of downtime can result in millions of financial losses. Klarrio's SRE's make sure platforms operate the way they should and downtime is always minimized. We at Klarrio, are looking for engineers to take a crucial role in creating, maintaining, and supporting reliable production platforms.

You will be working on a wide range of projects in various domains such as Smart Cities, Transport & Logistics, Telecom, Innovative Technology Solution Providers, and Public Infrastructure. Check out some of our and .

You will be part of a team that focuses on measuring and monitoring the availability, latency, and overall system health and performance. You will also be evolving systems by continually improving the monitoring stack by implementing the latest state-of-the-art technology that improves reliability and availability. If something goes wrong you will be instrumental in incident response and blameless postmortems.

The development and support of these platforms require a multidisciplinary team consisting of developers who are not afraid to take initiative and have an eye for quality. Klarrio will

strive to make sure that your deliverables are in line with your interests and your skillset. **We believe in our in-house synergies between team members to create the best possible solution for our customers. Therefore we always work on a project basis and don't do.**

We are looking for IT professionals with a drive for getting things done with a willingness to help others be successful in their job and a knack for always being a step ahead.

You are a naturally collaborative person and eager to propose creative solutions to challenging problems.

As a software engineer, ideally you possess the following qualifications:

Bachelor's degree, or equivalent practical experience, in Computer Science or a related technical field involving software/systems engineering.

Programming experience in either Python, Java, Scala, Go, or C.

Knowledge of computer networking (TCP/IP, Firewalls, DNS, SSL, ...)

Understanding of Operating System concepts

Understanding of Unix/Linux operating systems

Investigative mindsetExtra assets are:

Ability to debug code and automate routine tasks

Knowledge in deploying and using tools like Prometheus, Grafana, ELK stack ... or other logging, monitoring, and alerting tools is a plus

Hands-on experience with cloud platforms like AWS, Azure, ...

Hands-on experience with shell scripting.

Affinity with the Agile development methodology

We don't expect you to check all the boxes. An eagerness to learn with practical experience and a "can do"-attitude goes a very long way. The team synergies we build will help you both share your knowledge and learn from each other.

We offer a compensation package that contains a competitive salary, a phone with limitless

subscription, performance bonuses, health insurance, retirement planning, meal vouchers, additional holidays, and a .

You'll be supplied with a high-quality laptop, dual-screen setup, and mobile phone. Our offices are located in the center of Antwerp (only a 5-minute walk from central station) and equipped with standing/sitting desks, ergonomic office chairs, and free beverages/refreshments.

You'll be working in a technologically advanced environment with a broad variety of opportunities to improve your skills (technical puzzles, courses, certifications, regular and on-the-job training) in collaboration with highly skilled engineers. And perhaps the most important of all, you'll be able to do this with a bunch of like-minded individuals while enjoying one of our multiple yearly events.
