Software Quality Developer

Apply Now

Company: SKYLINE COMMUNICATIONS

Location: Brussels

Category: computer-and-mathematical

Nice to meet you!

Are you ready to leave your mark on the world? Because we are the **global leading supplier** of end-to-end open **monitoring and orchestration software** for ICT, media and broadband platforms. Basically, our software platform—**called DataMiner**—makes sure that you can order your products online, watch the latest episode of your favorite show, or call your friends whenever you need them.

We're looking for a Software Quality Developer

As a Software Quality Developer, you will **ensure that our product works the way it should** by applying testing with complete automation and simulation. You will be **designing test automation suites** for the latest technological innovations as well as **creating rich simulations** for the targeted working environments to ensure our test labs are as realistic as possible.

SOME OF OUR USERS

DataMiner is deployed by **1500 companies** in over **125 countries** worldwide.

Let's get down to business

A glimpse of.your [future]

Transparency is a key value here at Skyline. So let's forget about empty job titles or colorful

descriptions for a moment and take a look at what you'd actually be doing here.

You will **develop and automate test methods** and formal system tests.

You will **develop systems to test performance and usability** .

You will **develop or utilize off-the-shelf tools for simulation** of network environments and equipment.

You will **maintain and augment testing infrastructure** with self-developed and off-the-shelf tools.

You will coordinate with core software developers and system engineers to **gather testing requirements**.

You will develop, elaborate, and implement **Quality Assurance guidelines** .

What skills.do you require?

No doubt you know your way around code. But let's dig a bit deeper into the various technical skills you'll need to get started as a Software System Developer.

Solid knowledge of **relational databases**

Good knowledge of **TCP/IP**, **multithreading**, **Web Services**, and **Net Remoting**

Good knowledge of **C#** is preferred, or good experience with a **similar language**

Experience with **Jenkins** , **Wireshark** , **Ranorex** , and **Testlink**

Experience with **WPF**, **XML**, **HTML** , **.NET**, **Web Services**, and **IIS**

Your [competencies]

You'll be working in a highly technical environment prone to constant change and evolution. On top of that, you'll have to collaborate with a great many (marvelous) people. All very exciting! But it also calls for a special kind of mind- and skillset.

You are a **fast learner** who **thinks logically and analytically** , and understands complex systems.

You are **accurate** and you **like to dive deep** to find the root cause of a problem.

You contribute and thrive in a highly **agile environment**

You have good verbal and written **communication skills in English** .

You have a bachelor's, master's or doctorate **degree in ICT, Software and/or Telecom**
