

Solution Architect

[Apply Now](#)

Company: Ferranti Computer Systems

Location: Belgium

Category: computer-and-mathematical

Function description

Are you an experienced Architect looking for a next challenge? Do you want to work on exciting projects **together with your Ferranti team**? Do you prefer international projects or closer to home?

As an **experienced** Architect you will work in one of our project teams. You are responsible for the scope, quality and acceptance of the delivered solution. There are opportunities in **different technologies** so you are in control of your career and personal growth.

Your main tasks and responsibilities:

Validate functional and/or technical scope & project approach during the project in order to mitigate risks

Lead the Fit/Gap analysis to define the functional and/or technical approach

Convince the client stakeholders as well as the consultants and/or partners of the functional and/or technical approach and takes the lead in client sign-offs

Prevent and solve escalations from consultants, partners and clients

Work in close collaboration with the project manager

Take initiative to be informed about innovations in technology, market changes etc, and develop internal improvements

Share knowledge and coach consultants/partners towards a higher level

Support the sales team by writing commercial documents, giving sales demos etc.

Profile

You have:

At least 3 to 5 years of **experience** as a Solution Architect in successfully delivering multiple large-sized (2000+ mandays) **ERP implementation** projects characterized by systematic and milestone-driven work

A master's or bachelor's degree

Strong **leadership** skills (coaching, delegating & motivating, build trust, ...)

Experience in the Energy & Utilities sector is an asset

Knowledge of the software life cycle; knowledge of SQL Server

Experience in TFS / DevOps

Knowledge of D365 or Microsoft Dynamics is an asset

A non-stop drive to go out of your comfort zone to guarantee an end-to-end solution

You are:

Passionate about technology and innovation

Fluent in Dutch (native) and English.

A dynamic team player with a great sense of **responsibility**

Able to **communicate** on different levels (developers, business, C-level, stakeholders, ...)

Able to influence, negotiate and build consensus (with clients and colleagues)

A flexible person willing to travel

We offer

Be part of a leading, innovative company where you keep on track with the latest technology

A good **work life balance** and a team culture that is based on trust

A team culture that is based on trust and where continuous growth is naturally encouraged

Real career opportunities and **challenging projects** to work on!

Deep dive training by our knowledge center and support by a personal coach

A very **attractive salary package**: company car, insurance, portable pc, iPhone, internet connection, etc. that you can adapt to your needs (you can exchange part of your 13th month for a lease-bike, iPad, extra vacation, ...)
