Solution Architect

Apply Now

Company: UpWider

Location: Uccle

Category: computer-and-mathematical

UpWider is dedicated to providing innovative and cutting-edge technology solutions to meet the diverse needs of our clients. We are seeking a highly skilled and experienced Applicative Solution Architect to join our team and play a pivotal role in designing and implementing comprehensive application solutions that drive business success.

The Solution Architect is a crucial position responsible for creating end-to-end application solutions that align with business objectives and technological advancements. You will work closely with cross-functional teams to translate business requirements into technical design and architecture, ensuring the delivery of high-quality and scalable applications.

Key Responsibilities:

Collaborate with stakeholders to understand their requirements and design innovative application solutions that meet business goals.

Provide technical leadership and guidance to development teams throughout the application development lifecycle.

Develop and maintain application architecture blueprints, ensuring adherence to best

practices and industry standards.

Research and evaluate new technologies, tools, and frameworks to make informed recommendations for their integration into the architecture.

Ensure that the applications are scalable, highly performant, and maintainable over time.

Create and maintain comprehensive documentation of the application architecture, design decisions, and system components.

Collaborate with cross-functional teams, including developers, business analysts, and project managers, to ensure project success.

Stay updated on industry trends, best practices, and emerging technologies to enhance the application architecture and development process.

Qualifications:

Bachelor's or Master's degree in Computer Science, Software Engineering, or a related field.

Proven experience as an Domain Architect, Solution Architect or a similar role.

In-depth knowledge of application architecture, design patterns, frameworks (Zachman, TOGAF,..) and best practices.

Experience with microservices architecture, containerization, and orchestration (, Docker, Kubernetes).

Familiarity with databases, data modeling, and integration patterns.

Strong communication and interpersonal skills to effectively collaborate with diverse teams.

Relevant certifications (, AWS Certified Solutions Architect, TOGAF) are a plus.
