

Sr. Android System Software Engineer

[Apply Now](#)

Company: Barco

Location: Kortrijk

Category: computer-and-mathematical

Barco, a global technology frontrunner, pioneers solutions that empower positive outcomes globally. Focusing on the Enterprise, Healthcare, and Entertainment sectors, we engineer networked visualization solutions. Barco Taiwan Design Center (TDC) is at the heart of our Enterprise division, serving as the pivotal R&D hub. Here, we craft exceptional user experiences, differentiating our products for our valued customers and their teams.

We seek an adept software engineer to enrich our R&D team, focusing on crafting top-tier wireless collaboration solutions for meeting rooms with an agile approach. You will collaborate with Scrum teams within Barco's agile engineering framework to elevate product experiences. We desire a seasoned software engineer who is sincerely dedicated to learning and software development. Our engineers are inherently driven and thrive on pioneering initiatives aligning with business objectives and technical excellence.

Our target talent is an **Android System Software Engineer**. Proficiency in core embedded architecture and development (including drivers, encoding, decoding, image processing, and device management) is essential. Additionally, your drive to achieve Sprint Goals extends to broader ecosystem aspects such as applications and framework integration, particularly emphasizing security.

Key Responsibilities

You will play a pivotal role in translating user stories into practical implementations that align with the overall software architecture.

You develop and optimize **Android systems** by proficiently using C++, Kotlin, and Java.

You deliver high-quality code, including documentation and unit testing.

You make informed technological choices balancing speed to market and high quality.

You define integration approaches towards 3rd party components.

You will contribute **embedded software development** for products in the ClickShare portfolio.

Qualifications

You have at least 5 years of proven software development experience in Android.

Android development skills: Proficiency in Android development **Java/Kotlin** Experience with **system level development** (framework/HAL) on Android platform (knowledge of MDEP is a plus).

You are familiar with these domains/tools: Python, C++, Qt Networking, security, video/audio processing, codecs, OpenGL, Android media framework CI/CD, Jenkins, TDD, automation

You have the ability to work independently in a global organization with tight deadlines.

You are proficient in written and verbal communication in both English and Mandarin.

You have the experience in scaled Agile practices (Scrum, Kanban, etc.).

If you're ready to take your software engineering career to the next level, join us and become part of the passionate team!
