

Supplier Operations Engineer (SOM Engineer)

[Apply Now](#)

Company: Asco

Location: Zaventem

Category: computer-and-mathematical

Company Introduction :

ASCO , part of Swiss group **Montana Aerospace** began operations as a private subcontractor in 1954.

Today **ASCO** Group is engaged in a broad range of development, engineering, manufacturing and assembly activities providing multidisciplinary subcontracting services to various markets and aerospace programs around the world.

Asco operates from several locations, Belgium, Canada, Germany and USA, with a turnover exceeding 200 million euros.

Asco produces over 2,500 assemblies every month and has the ambition to be a world leader in design and manufacture of high lift devices, complex mechanical assemblies and major functional components for the aerospace industry.

Montana Aerospace AG is a highly-vertically integrated manufacturer and supplier of system components and complex assemblies for the aerospace, e-mobility and energy sectors with worldwide engineering and manufacturing operations announced the signing of the acquisition of 100% of shares of the Asco Group on the 7th of September 2021.

The **Supplier Operations Engineer** holds the operational responsibility for the order management and the follow up of the deliveries for a group of direct production related materials associated with a number of assigned suppliers. He/she builds a long term business relationships with these suppliers so mutual targets can be achieved.

Accountabilities

1. Order management

Manage the ordering of materials and the physical incoming supply chain for the assigned suppliers

Prevent / minimize the interruptions of production and shortage on inventories through proactive management of the orderbook while guaranteeing follow up and communication

Negotiate with suppliers concerning availability of their material and the security of their promises and supply.

Analyze root causes of production interruptions and shortage of inventories due to issues in the supply chain

Visualise and quantify supply risks, draw action plans for supply improvement, in line with production and customer expectations

Build recovery plans and counter measures for supply risk elimination and coordinate actions with internal experts (buyers, SQA, Logistics, teamleader, mentor...).

2. Supplier performance measurement and follow-up

Perform On-Time-Delivery Supplier performance evaluation to identify (non) tangible risks and opportunities for supplier to improve.

Evaluate and improve applicable internal supplier performance targets such as internal lead-times, inventory levels, takt times,

3. Master data management

Assure all-time accurate and reliable vendor and material master data and parameters in the applicable systems related to the assigned suppliers and materials.

Promote and develop the use of the Asco Supplier Portal (ASP) with suppliers and internal stakeholders

4. Change Management

Coordinate with internal and supplier stakeholders the implementation of supply chain changes impacting assigned suppliers (part design change, subtier, resourcing...)

Audit and assess manufacturing and logistic processes at existing and potential new suppliers and deliver the necessary reports

Document and track progress on corrective actions from the above mentioned audits

Apply the standard Transfer of Work procedure to identify and mitigate the risks

5. Supplier Development

Continuously develop the performance of the strategic suppliers nominated on management level for mutual company benefits and added value plans

Identify improvement potential at suppliers, in areas such as reduction of lead time, costs and supply/capacity risks

Develop specific (non)/ tangible target oriented continuous improvement plans

Implement and follow-up continuous improvement programs in co-operation with the buyer, SQA, other stakeholders....

Establish full documentation on supplier manufacturing processes, throughput times, supply risks, etc... to build supplier knowledge and history

Profile, Know How and Experience

Education: Supply Chain, Industrial or Civil engineer or equal by experience

Languages: French and/or Dutch, English

Skills / Experience:

5 years of Experience as a Supply Chain Specialist in the industry

Thorough knowledge and interest in logistics and lean manufacturing processes and familiar with Project Management Tools

Familiar with an ERP system and planning process

Analytical skills, facts based approach, great attention to details, good use of Excel

Sensitive to commercial aspects

Highly developed interpersonal and communication skills; capable to interact with senior management at suppliers and build relationships

Good team-player but can work autonomously

Flexible thinker

Result oriented and takes responsibility

Takes initiative and display a pro-active attitude

Loves to work in a dynamic environment

Open to travel
