System Engineer Consultant

Apply Now

Company: Istorm

Location: Brussels

Category: computer-and-mathematical

FunctieomschrijvingAs a System Engineer, you will be in charge of building, managing and supporting complex customer IT infrastructure using leading edge technologies. You provide operational support (2nd and 3rd line) and you implement, you patch, you upgrade or you migrate client's infrastructure (eg.?VMWare, Hyper-V, Office 365,?Azure,…).

Together with your team, you are responsible for the operational management of the infrastructure of the clients assigned to you. You provide our clients with operational support (2nd and 3rd line) and you implement, patch, upgrade or migrate the client's infrastructure (eg. VMWare, Hyper-V, Office 365, Azure,…).

Your responsibilities will include:

Incident and service request handling in accordance with our internal processes

Implementation of projects for the client within the negotiated scope taking into consideration technical possibilities, respecting milestones and deadlines

Staying up to date with technology evolutions and making sure your knowledge remains ahead of the curve?

Grow and gain experience, become a subject matter expert in your field and guide your colleagues with their complex technical questions?

Ownership for the client relationship: you are recognized by the client as a technical expert, from whom to seek advise?

Support our sales team with your technical expertise

Technical/technological discussions with the clients?

Be part of our 24×7 support?team?

ProfielExcellent knowledge of Microsoft Windows Server/10 and/or Red Hat Enterprise Linux Operating systems including various high availability technologies.

Hands-on knowledge of Microsoft Active Directory, ADFS, Exchange, IIS, SCCM and Intune.

Experience with VMware data center virtualization products: ESXi, vCenter, vSAN, Horizon, SRM and/or Microsoft Hyper-V.

Worked with Fibre / iSCSI SAN, NAS and NFS storage systems.

Working experience with Microsoft Azure, the ideal candidate has achieved the Azure Administrator Associate Microsoft certification.

Good knowledge of Microsoft SQL Server, focusing on (disaster) recovery techniques.

Experience with backup, enterprise infrastructure monitoring, vulnerability management and patching products.

Familiar with the Dell or HP server, storage & networking portfolio.

At least +5 years of experience as a System Engineer, with experience managing autonomously several hosting infrastructure and/or End User Computing implementation projects.

You have good communication skills in English and Dutch or French (or both)

Organisatie- en afdelingomschrijvingMy client is a consultancy company located in Brussels South. To grow up their IT Infrastructure team, they are looking for system engineers.

AanbodBesides a permanent contract, a competitive salary and extra-benefits, they offer you a dynamic work environment with smart colleagues in a fast-growing company and clients with exciting challenges.
