

Technical Architect Engineering

[Apply Now](#)

Company: Ypto

Location: Bruxelles

Category: computer-and-mathematical

About Us: Join our team at SNCB, where innovation meets excellence. As a Technical Architect combined with a role as System Engineer, you'll be at the forefront of shaping technology domains within our organization. Be a key player in driving technical leadership, implementing best practices, and contributing to the evolution of our technical architecture.

Role Overview Technical ArchitectAs a Technical Architect Engineering, your core responsibilities encompass communication, research, planning, improvement, and governance of the Technical Architecture at SNCB. You'll work on reference architectures, create building blocks, support Solution Architects, and enhance projects by modifying building blocks and maintaining roadmaps.

Key Tasks and Responsibilities Technical Architect:

Provide technical leadership and insights to Solution Architects for identified/required technologies

Apply hands-on IT best practices and architectural standards

Offer expertise in your disciplines and areas

Maintain roadmaps for product components in designated technology areas

Coach, guide, and support the implementation team, collaborating closely with our external partner

Validate and provide feedback on detailed designs

Document the environment using Archimate in SparX following the defined metamodel

Translate application requirements into cloud and infrastructure architectures

Elaborate roadmaps and business cases

Knowledge of project & modeling methodologies

Knowledge of business processes

To be able to plan ahead for at least 5 years

Role Overview System EngineerAs a System Engineer, you will be responsible for the technical development, planning, and maintenance of the endpoint infrastructure to ensure continuity and efficiency.

Key Tasks and Responsibilities System Engineer:

Evaluate the backend and endpoint infrastructure environment and propose upgrades, changes, and improvements

Conduct feasibility studies and evaluate different software and hardware solutions

Inform and guide infrastructure users for optimal and efficient system usage

Create technical designs in line with architecture requirements

Implement changes, upgrades, and expansions to software and hardware

Provide necessary support and maintenance to the B-IT infrastructure in line with the ITIL methodology

Provide technical advice to internal and external clients

Act as a focal point within the specific expertise area

Keep knowledge up-to-date and share it within the technical field

Vereisten

Master's degree or equivalent through experience.

Minimum of 10 years of relevant experience as a Technical Architect.

Proficient in English and Dutch or French (preferably with at least a passive knowledge of the second language).

Demonstrated knowledge of:

Datacenters & cloud architecture

Data Services (RDBMS, NoSQL, ETL/CDC)

Azure IaaS & PaaS

Container platforms (Kubernetes)

HA and DR Solutions (DC, Hybrid, and Cloud only)

Security/privacy best practices on infrastructure, network, applications, and data

Certification as (Cloud) Security Architect

Experience with Azure AD, SAP IDM, Trustbuilder, Cyberark

Knowledge of Azure automation, infrastructure as code, consumption & licensing

Knowledge of Data Analytics on Azure

Knowledge of API Management integration technologies and Service Architecture

Experience with a multi-cloud environment

Ability to understand and apply the long-term (Big Picture) vision and tactical needs

Customer-oriented and security-minded

Strong interpersonal skills, including teamwork, facilitating, and negotiating

Excellent analytical and technical skills

Excellent oral and written communication skills

Excellent planning and organizational skills

Experience working together with Service Providers

Expert knowledge in Active Directory, Exchange, Azure, SMTP, PKI, certificates

If you are a seasoned Technical Architect & System Engineer ready to contribute to our dynamic environment, we invite you to apply and be a part of our journey at SNCB.

Our offer

Within our open corporate culture, you contribute to the digital transformation of SNCB. You will have a job with social impact and ample opportunity to make your own contribution. In addition to a good work-life balance and a competitive salary, you will receive the following benefits:

the possibility to work remotely + flexible working hours;

35 days of leave;

a company car + a public transport season ticket;

a target bonus;

a comprehensive insurance package (affiliation without own contribution, excl. outpatient costs for family members);hospitalisation and dental care for the whole family;outpatient costs (= medical costs separate from hospitalisation);group insurance: supplementary pension, work disability and death (cafeteria plan);accidents at work (extralegal);

meal vouchers and eco-vouchers;

net allowances for remote working and carwash + internet budget.
